10 Tools Every Administrator Needs

ERD Commander™ 2005

Boot a dead system from CD into a familiar Windows-like repair environment.

- ▶ **Crash Analyzer Wizard™** Pinpoint the cause of system crashes so that you can make rapid repairs.
- ▶ **Remote Recover™** Remotely access an unbootable system to make repairs.
- ▶ **NTFSDOS Professional™** Access NTFS volumes from DOS.
- ▶ **FileRestore™** Restore deleted files, even when they have been deleted from the recycle bin.
- ▶ **Filemon™** View real-time reports of all file system activity on a system.
- ▶ **Regmon™** View real-time reports of all registry activity on a system.
- ▶ **Insight™ for Active Directory** View real-time reports of all LDAP traffic on a system.
- ▶ **AD Explorer™** Explore the AD structure to find and modify objects and their attributes.
- ▶ **TCP Tools™** Displays all active TCP and UDP endpoints and relays real-time TCP/IP activity data.

Being able to rescue a machine from the dead is terrific. The fact that it recovered the server so quickly showed an immediate return on investment to our management and also saves our taxpayers money.
